

Allergy Machine – HEGA Series

TECHNICAL SPECIFICATIONS

Efficiency:	99.97% efficient at removing particulates as small as 0.3 micron 95% efficient in removing particulates 0.1 micron and smaller
Coverage Area:	Cleans up to 1,500 sq. ft. efficiently
Fan Rating:	400 cfm (cubic feet per minute)
Dimensions:	Height: 23" Width: 14.5" x 14.5"
Weight:	35 lbs.

FILTER SPECIFICATIONS

Type:	4-Stage Filter
Configuration:	Large Particle Pre-filter Medium Particle Pre-filter 60 ft. of True Medical Grade HEPA Activated Military Carbon Cloth
Filter Life:	5-years under normal residential use
Additional Features:	Foam sealing gaskets top and bottom

FAN & MOTOR SPECIFICATIONS

Fan Type:	Centrifugal fan with 3-Speed control
Power Rating:	1.3 amps, 120 volts
Consumption:	135 watts at highest setting
Motor Type:	Permanent Split Capacitor - rated for continuous use at high RPM & long life
Additional Features:	Motor mounted on shock absorbers CSA, UL and CE approved

HOUSING

Material:	All steel construction
Air Intake:	360° intake system
Air Output:	One side, upper deck outlet
Filter Access:	Bottom plate easily removed
Finish:	Baked-on powder coat
